

Eurofins | Environment Testing EnviroNote 1115 – May 2021

Eurofins SYDNEY Laboratory is now NATA accredited for PFAS

Eurofins Environment Testing Sydney Laboratory is now NATA accredited for PFAS which means quicker turnaround times for your important projects. The Sydney laboratory is equipped with a number of the state-of-the-art LC-MS/MS instruments allowing for full compliance with QSM 5.3 requirements. Eurofins Environment Testing understands the need to identify and monitor for emerging contaminants such as PFAS. With probably the most extensive technical level of expertise with PFAS analysis in Australia, we are able to provide a high-quality and cost-effective solution to meet your PFAS testing needs.

that we understand your analytical needs, accomplish your data quality objectives, and ensure you stay abreast of ever-changing regulations.

You are assured of receiving legally defensible data with consistent fast turnaround times every time. Our service network now supports you in your PFAS work across all of Australia through our National network of laboratories and offices on both the east and west coasts that are now all fully validated. Quality encompasses more than just error-free and defensible data; our industry leading program incorporates the technical guidance and expertise of our PFAS Experts to ensure

Eurofins utilises accurate and precise methods along with our unmatched expertise to support PFAS analysis.

Logistical Support

If you want a PFAS testing facility that you can trust, choose Eurofins Environment Testing Laboratory for quality analysis, superior customer service, and consistent reliability. If you would like to discuss logistical details for your upcoming projects then please contact your local Analytical Service Manager or one of our Business Development Team.
