

EnviroNote 1147 - July 2026

## Expanded NATA-Accredited Water Testing Now Available in Tasmania

Eurofins Environment Testing Australia is pleased to announce the expansion of NATA-accredited water testing services at our Hobart laboratory, strengthening local analytical capability and providing Tasmanian clients with faster access to trusted, high-quality results.

The expanded scope now includes a broader range of accredited analyses for microorganisms, as well as physical and chemical water quality characteristics, delivered locally in Tasmania. This enhanced capability reduces reliance on interstate testing, supports improved turnaround times for time-sensitive projects and enables more efficient sample processing. Whether for environmental monitoring, operational decision-making or regulatory compliance, clients can now access an expanded suite of accredited services backed by Eurofins' global scientific expertise and commitment to quality.

### Enhanced Local Testing Capability

Our Hobart laboratory now offers NATA-accredited service for key water quality indicators, including:

#### Analysis for microorganisms

- *Enterococci* by membrane filtration
- *Pseudomonas aeruginosa* by membrane filtration
- *Escherichia coli*, Coliforms, Thermotolerant Coliforms – by membrane filtration and most probable number (MPN)
- Heterotrophic Colony Count (HCC) by pour plate

#### Analysis for physical and chemical characteristics

- pH
- Conductivity
- Turbidity
- Free and Total Chlorine

### Supporting a Wide Range of Water Types

The expanded accredited scope covers diverse water matrices, including potable and recycled water, fresh and marine waters, industrial and trade waste streams, sewage, swimming pool and spa waters, treated and recirculating waters, as well as purified and processed waters.

### Delivering Better Outcomes for Tasmania

By increasing accredited testing capacity within Tasmania, Eurofins is helping clients access local expertise and faster analytical services when they matter most.

Combined with Eurofins' national laboratory network, technical specialists and commitment to scientific excellence, the expanded Hobart capability provides a reliable local solution for water quality monitoring across government, industry, utilities, environmental consultants and water managers.
